GENERAL RECOMMENDATIONS

SURE CROP MICRO is recommended as a supplementary source of plant nutrients to be added to a total crop fertility program. For best results, refer to soil and/or plant analysis to determine crop nutrient deficiencies or imbalances.

**PRE-PLANT** Apply 12-24 oz. p/Acre of SURE CROP MICRO with sufficient water or fertilizer solution in broadcast dribble, or band application.

**SIDE DRESS** Apply 12 oz. p/Acre SURE CROP MICRO with starter fertilizer for row or band application.

**PLANTING** Apply 12 oz. p/Acre of SURE CROP MICRO with starter fertilizer for row or band application.

**TOP DRESS OR FOLIAR** Apply 12 oz. p/Acre of SURE CROP MICRO with sufficient water or fertilizer solution for adequate and even coverage. Use equipment to give uniform coverage with 30 to 90 PSI for best results.

Agitate before adding to tank solution. Consult product label for further blending, storage, and application instructions.
