GENERAL RECOMMENDATION

SURE CROP POWER-PAK with crop protection herbicides where Ammonium Sulfate is recommended. Mitigates drift and minimize leaf surface tension for immediate absorption.

APPLICATION Apply 1-2 qts p/Acre of SURE CROP POWER-PAK per 100 gallons of spray solution. Under extremely hard water conditions, additional SURE CROP POWER-PAK may be required.

DIRECTIONS Always use SURE CROP POWER-PAK in accordance with the instructions concerning additives found on the chemical label. Shake well or re-circulate before using if product has been stored below 32°F. When mixing, fill spray tank 1/3 to 2/3 full with clean water. Proceed with agitation, add SURE CROP POWER-PAK and then appropriate amount of crop protection chemical. Continue with adding the remainder of water and maintain agitation until spray blend has been applied to ensure uniform spray blend.

Consult product label for further blending, storage, and application instructions.
